I.V. HOUSE®

Protection Over and Above®

750LFP

750LFP I.V. House UltraDome® Plus Directions

Single Use Only

1. Place an I.V. House UltraDome over the catheter hub and transparent dressing after taping the loop of tubing or extension set small enough to fit entirely under the inner curve of the domed end of the I.V. House UltraDome. Tape across the I.V. House UltraDome to hold the protective dome in place. Allow the tubing to exit the open end.
2. Lift the tape from one side to inspect the IV site according to your nursing practice guidelines.
3. Change the I.V. House UltraDome each time a new IV is inserted.

Puppy Sticker

Remove the crack and peel backing from the puppy sticker and apply the sticker to the dome. Tell the patient that the puppy likes to sleep on the "house" and to leave her alone.
